# Master of science (MSc) in psychology

## GENERAL OUTLINE

### Objectives

This Master's programme is designed as a cycle of specialisation providing access to the profession of psychologist. It is based on the knowledge acquired during the Bachelor of Science in Psychology. On completion of the Master's degree you will be able to:

- explain, evaluate, compare and discuss specific aspects of knowledge in psychology, in the orientation chosen for the Master's degree, and put them into perspective in relation to their epistemological status;
- implement, acting independently, a scientific research process;
- master the use of intervention tools related to the application scope of the chosen orientation in psychology;
- present, in a structured and reasoned manner, an in-depth reflection, in both written and oral form;
- use the relevant knowledge, analytic skills and intervention tools in different contexts, showing respect and consideration for diversity;
- develop ethical and socially responsible positions in the practice of psychology.

### Career prospects

In addition to these specific skills and knowledge in distinct fields of psychology, university studies develop a great many transverse

skills such as: oral and written communication, critical, analytical and summarising faculties, abilities in research, and so on.

This range of skills prepares students for professional posts in a wide variety of sectors:

- Medico-psychological consultation services
- Psychogeriatrics and Geriatrics
- Psychology of professional, university or careers guidance counselling
- Psychology, Psychomotor Therapy and Speech Therapy in the educational field
- Parapublic Institutions (e.g. care homes for the elderly, adolescent homes)
- Prevention and public health (e.g. industrial health and safety)
- Research and Teaching (e.g. UNIL, CHUV – Psychiatry)
- Other: associative structures, intervention services (e.g. police), private service companies or consultancies in the organisation of firms, public administration, etc.)
- Private practice (consultation, check-up, psychological evaluation, etc.).

In several fields, particularly those where a federal specialisation degree exists (e.g. psychotherapy), postgraduate training is necessary after completing the Master's degree.

## EDUCATIONAL CONTENT

### Description

The Master's programme consists of:

- a main orientation (including compulsory and optional courses, as well as an optional placement in the field of research or practical psychological intervention);
- optional modules providing links to other sectors of psychology or allowing consolidation of the main area of specialisation;
- a dissertation.

The main specialisation is to be chosen from among the following 5 fields:

- Clinical Psychology and Psychopathology;
- Child and Adolescent Psychology;
- Counselling and Vocational Psychology;
- Health Psychology: Historical and Cultural Approach;
- Social and Intercultural Psychology

Two of these specialisations offer access to consultations (see below)

### Internship

The 5 orientations of the Master's degree include an internship, to be completed in the second year of study in the area of the chosen orientation, accompanied by a seminar developing what the student achieved during the internship. The internship is worth 12-18 ECTS credits, depending on the orientation, and it can be replaced by courses relevant to a personal project developed by the student. Additional information about the internship is available on page:

[www.unil.ch/ssp/stages-master-psycho](http://www.unil.ch/ssp/stages-master-psycho)

### Mobility

You have the possibility of following part of your studies in a partner institution recognised by UNIL. If the mobility study programme is approved by the Faculty's Mobility Commission and is validated by a pass in the examinations, the credits obtained in mobility will be recognised and validated as part of your degree course.

### Admission to orientations involving consultation

The number of places available in the orientations involving consultation (i.e., the orientations «Child and Adolescent Psychology (with consultation)» and «Counselling and Vocational Psychology») is limited. For admission to these orientations it is therefore necessary to submit an application to the ad hoc committees at the Institute of Psychology, in addition to the usual application for admission to the Master's degree course (which must be sent instead to the Admissions Service). For more information on deadlines for sending the application, its contents or the selection criteria, see «Admission» on page:

[www.unil.ch/ssp/master-psychologie](http://www.unil.ch/ssp/master-psychologie)

## SYLLABUS

### 1<sup>st</sup>–4<sup>th</sup> semester

Major

- Compulsory subjects
- Optional subjects
- Internship (optional)

**54 to 78 ECTS credits depending on the chosen orientation**

Optional subjects

**1 to 3 optional modules, 12 ECTS credits each, according to the chosen orientation**

Dissertation

**30 ECTS credits**

## PRACTICAL INFORMATION

### Admission requirements

Candidates must hold a Bachelor of Science in Psychology degree awarded by a Swiss university. For specialisations including consultations, see the "Admission to specialisations including consultations" paragraph.

The holders of Bachelor of Science in Psychology degrees awarded by other universities may be admitted on the basis of their personal case file, subject to the candidate's formal admissibility to the master's degree course.

[www.unil.ch/ssp/master-psychologie](http://www.unil.ch/ssp/master-psychologie)

### Enrolment and final dates

The Master of Science in Psychology can be commenced in the autumn or spring semesters, except for the Child and Adolescent Consultation orientation (please contact the study advisor for more information concerning this course).

Applications to be submitted before the deadline to the Admissions Office:

[www.unil.ch/immat](http://www.unil.ch/immat)

Autumn semester: 30 April

Spring semester: 30 November

**Candidates needing a visa to study in Switzerland must apply for enrolment two months prior to these deadlines.**

### Start of courses

Autumn semester: mid-September

Spring semester: mid-February

Academic calendar: [www.unil.ch/central/calendrier](http://www.unil.ch/central/calendrier)

### Part-time Master's degree

Under certain conditions, a Master programme can be followed part-time. See [www.unil.ch/formations/tempspartiel](http://www.unil.ch/formations/tempspartiel).
